UNLOCK YOUR CHILDS POTENTIAL

**Curriculum Tailored for Each Individual and Each Subject:** With the individualized instruction in our classrooms, special needs students excel and gifted students progress without limits. Curriculum is tailored subject by subject for each child. All children are continually challenged to reach their highest potential in each area of study.

**Concrete, Hands-on Discovery:** Direct personal contact with physical objects and tactile models bring complex math and science concepts to life. Before students ever memorize  $3 \times 4 = 12$ , they touch and see 3 rows of 4. The Montessori Method naturally leads the child from concrete experimentation to abstract critical thinking.

**Self-direction and Passion for Learning:** Within a framework of firm guidance, children progress at their own pace. Students learn early how to take responsibility for their own work plan and manage their time effectively. Flexible curriculum enables children to explore their passions and interests independent of their peers. This self-direction develops independence and a passion for learning.

**Mixed Age Classrooms:** Our Montessori classes are designed for multiple age mixes (3 to 6, 6 to 9, and 9 to 12 years of age) to meet the needs of specific stages of development. This allows the younger students to learn from the older and the older students to reinforce what they know by assisting the younger students.

**Scientifically Designed for the Child:** The CCM Montessori environment is designed for the children's cognitive level and size. Classroom materials match the capabilities, interests, and needs of each age group. The furniture and even bathroom fixtures are sized for the student. All materials are accessible and developmentally appropriate.

**A Christian Foundation and Family Atmosphere:** We nurture your child's relationship with God through Jesus Christ while being careful to avoid interdenominational differences. We're proud of the diverse array of denominations and faiths that entrust their children to us. We work hard to build a family like atmosphere for students and parents alike.

**Bright, Spacious Facility and Campus:** Our large, modern facility has ample room for children to learn and grow. All classrooms have large walls of windows for plenty of natural light. We have dedicated spaces for before and aftercare, indoor recess spaces, multiple expansive outdoor learning areas, and more.
